

# Nucleus® Hybrid™ L24 Implant System New Enrollment Study

## What

This research study is a long-term evaluation of the safety and effectiveness of the Nucleus Hybrid L24 cochlear implant system.

## Who

Patients who have severe hearing loss for high-pitched sounds but reasonably good hearing for lower pitched sounds, and who do not understand speech well with hearing aids alone may be eligible to participate in this research study.

## Pay

The sponsor, Cochlear Americas, will pay \$12.50 per hour to participants in the study based on the estimated predefined time participants spend per session.

## Details
